Kemper Reports Strong Fourth Quarter and Full Year 2018 Operating Results

CHICAGO, February 11, 2019 — Kemper Corporation (NYSE: KMPR) reported net income of \$6.5 million, or \$0.10 per diluted share, for the fourth quarter of 2018, compared to \$36.9 million, or \$0.71 per diluted share, for the fourth quarter of 2017. In the fourth quarter of 2018, net income included a \$60.4 million after-tax loss, or \$0.93 per diluted share, attributable to the change in fair value of equity and convertible securities. As adjusted for the acquisition of Infinity Property and Casualty Corporation¹, net income was \$27.0 million, or \$0.41 per diluted share, for the fourth quarter of 2018, compared to \$51.6 million, or \$0.79 per diluted share, for the fourth quarter of 2017.

Adjusted consolidated net operating income² was \$59.9 million, or \$0.91 per diluted share, for the fourth quarter of 2018,

compared to \$31.0 million, or \$0.60 per diluted share, for the fourth quarter of 2017. These results increased primarily from the continued profitable growth in Specialty Property & Casualty Insurance segment and continued improvement in Preferred Property & Casualty Insurance segment, partially offset by the amortization of the Infinity purchase accounting adjustments.

Highlights of the quarter include:

- *Consolidated earned premiums increased by 76 percent, or \$457.7 million in the quarter, as reported, 12 percent, or \$111.9 million, as adjusted¹*
- *Specialty Property & Casualty Insurance segment's earned premiums increased by 165 percent, or \$447.1 million in the quarter, as reported, or 16 percent, or \$101.3 million, as adjusted¹*
- *Investment portfolio generated a pre-tax equivalent annualized book yield of 4.6 percent in the quarter*

"Kemper had a great 2018 with strong earnings and solid operating performance in our core businesses, and the achievement of several notable milestones," said Joseph P. Lacher, Jr., President and CEO. "Investments in our franchise resulted in record-setting sales and premium growth in our specialty personal auto business, with consistently strong results in our health and life businesses and improving results in our preferred auto and homeowners lines. The close of our acquisition of Infinity and our refreshed brand represent meaningful steps forward in the progress on our strategic plan to focus on long-term, profitable growth."

¹ As Adjusted is a non-GAAP measure, which is computed by excluding the impact of purchase accounting and including the historical results of Legacy Kemper and Legacy Infinity in periods prior to the acquisition date of July 2, 2018. See "Use of Non-GAAP Financial Measures" for additional information.

² Adjusted consolidated net operating income is an after-tax, non-GAAP financial measure. See "Use of Non-GAAP Financial Measures" for additional information.

Capital

Total Shareholders' Equity at the end of the quarter was \$3,050.1 million, an increase of \$934.5 million, or 44 percent, since year-end 2017 driven by the acquisition of Infinity and net income. During the fourth quarter of 2018, Kemper repaid \$215 million of the \$250 million term loan facility that was used to facilitate the funding of the acquisition of Infinity. Kemper ended the quarter with cash and investments at the holding company of \$100.6 million, and the \$300 million revolving credit agreement was undrawn.

During the fourth quarter of 2018, Kemper paid dividends of \$15.6 million.

Kemper ended the quarter with a book value per share of \$47.10, an increase of 15 percent from \$41.11 at the end of 2017. Book value per share excluding net unrealized gains on fixed maturities was \$45.40, up 28 percent from \$35.57 at the end of 2017, driven by the Infinity acquisition and net income, partially offset by dividends paid to shareholders.

Revenues

Total revenues for the fourth quarter of 2018 increased \$397.4 million, or 57 percent, to \$1,094.7 million, compared to the fourth quarter of 2017, driven by \$447.1 million of higher Specialty earned premiums. On an as adjusted basis, revenues for the fourth quarter of 2018 increased \$41.2 million, or 4 percent, to \$1,094.7 million, compared to the fourth quarter of 2017, driven by \$101.3 million of higher Specialty earned premiums primarily from higher policies in-force, partially offset by \$76.4 million of lower revenues from the decrease in the fair values of equity and convertible securities. Net investment income increased \$8.7 million to \$91.3 million in the fourth quarter of 2018, primarily from an \$8.9 million increase in interest on fixed income securities and a \$4.3 million increase in dividends on equity securities, partially offset by a \$6.6 million reduction in net investment income on the alternative investments portfolio. Net realized investment gains were \$16.4 million in the fourth quarter of 2018, compared to \$11.5 million last year. Other income increased \$0.9 million to \$2.0 million in the fourth quarter of 2018.

Segment Results

Unless otherwise noted, (i) the segment results discussed below are presented on an after-tax basis, (ii) prior-year development includes both catastrophe and non-catastrophe losses and LAE, (iii) catastrophe losses and LAE exclude the impact of prior-year development, (iv) underlying loss ratio includes loss and LAE, and (v) all comparisons are made to the prior year quarter unless otherwise stated.

The Preferred Property & Casualty Insurance segment reported net operating income of \$6.0 million for the fourth quarter of 2018, compared to a loss of \$11.7 million in 2017. Results increased primarily from Personal Automobile Insurance premium growth and underlying loss ratio improvements, and lower net catastrophe losses in Homeowners Insurance, largely due to recoveries from the aggregate catastrophe reinsurance program. The Preferred Property & Casualty Insurance segment's combined ratio improved 13.9 percentage points to 103.9 percent, while the underlying combined ratio increased 4.7 percentage points to 94.6 percent in the fourth quarter of 2018. The increase in the underlying combined ratio was driven mainly by an increase in the underlying loss ratio in Homeowners associated with both the additional reinsurance purchased and the strong fourth quarter 2017 comparative underlying results.

The Specialty Property & Casualty Insurance segment reported net operating income of \$48.5 million for the fourth quarter of 2018, compared to \$14.3 million in 2017. Results increased primarily from strong Personal Automobile growth and profitability, partially offset by the impact of the amortization of the Infinity purchase accounting adjustments. On an as adjusted basis, the segment's net operating income was \$69.3 million in the fourth quarter of 2018, compared to \$26.4 million in 2017. The segment's underlying combined ratio improved 1.1 percentage points to 94.5 percent in the fourth quarter of 2018, primarily from an improvement in the underlying loss and LAE ratio in both Personal Automobile and Commercial Automobile, partially offset by an increase in the insurance expense ratio due to the amortization of the Infinity purchase accounting adjustments.

The Life & Health Insurance segment reported net operating income of \$13.6 million for the fourth quarter of 2018, compared to \$25.7 million in 2017, primarily driven by higher benefits costs, an increase in expenses and a reduction in investment income. The Benefits' ratio was impacted by an increase in the frequency of claims in comparison to the fourth quarter of 2017. In terms of the expense increase, about \$2 million of the expense increase is related to one-time items. Most of the remaining increase in expense is tied to volume and non-run rate business investments that are expensed on an as occurred basis.

Use of Non-GAAP Financial Measures

Adjusted Consolidated Net Operating Income

Adjusted Consolidated Net Operating Income is an after-tax, non-GAAP financial measure computed by excluding from Income from Continuing Operations the after-tax impact of 1) loss from change in fair value of equity and convertible securities, 2) net realized gains on sales of investments, 3) net impairment losses recognized in earnings related to investments, 4) acquisition related transaction, integration and other costs, 5) loss from early extinguishment of debt and 6) significant non-recurring or infrequent items that may not be indicative of ongoing operations. Significant non-recurring items are excluded when (a) the nature of the charge or gain is such that it is reasonably unlikely to recur within two years and (b) there has been no similar charge or gain within the prior two years. The most directly comparable GAAP financial measure is Income from Continuing Operations.

Kemper believes that Adjusted Consolidated Net Operating Income provides investors with a valuable measure of its ongoing performance because it reveals underlying operational performance trends that otherwise might be less apparent if the items were not excluded. Loss from Change in Fair Value of Equity and Convertible Securities, Net Realized Gains on Sales of Investments and Net Impairment Losses Recognized in Earnings related to investments included in the Company's results may vary significantly between periods and are generally driven by business decisions and external economic developments such as capital market conditions that impact the values of the Company's investments, the timing of which is unrelated to the insurance underwriting process. Loss from Early Extinguishment of Debt is driven by the Company's financing and refinancing decisions and capital needs, as well as external economic developments such as debt market conditions, the timing of which is unrelated to the insurance underwriting process. Acquisition Related Transaction, Integration and Other Costs may vary significantly between periods and are generally driven by the timing of acquisitions and business decisions which are unrelated to the insurance underwriting process. Significant non-recurring items are excluded because, by their nature, they are not indicative of the Company's business or economic trends.

Diluted Adjusted Consolidated Net Operating Income Per Unrestricted Share

Diluted Adjusted Consolidated Net Operating Income Per Unrestricted Share is a non-GAAP financial measure computed by dividing Adjusted Consolidated Net Operating Income attributed to unrestricted shares by the weighted-average unrestricted shares and equivalent shares outstanding. The most directly comparable GAAP financial measure is Diluted Income from Continuing Operations Per Unrestricted Share.

Book Value Per Share Excluding Net Unrealized Gains on Fixed Maturities

Book Value Per Share Excluding Net Unrealized Gains on Fixed Maturities is a ratio that uses a non-GAAP financial measure. It is calculated by dividing shareholders' equity after excluding the after-tax impact of net unrealized gains on fixed income securities by total Common Shares Issued and Outstanding. Book Value Per Share is the most directly comparable GAAP financial measure. Kemper uses the trends in book value per share, excluding the after-tax impact of net unrealized gains on fixed income securities, in conjunction with book value per share to identify and analyze the change in net worth attributable to management efforts between periods. Kemper believes the non-GAAP financial measure is useful to investors because it eliminates the effect of items that can fluctuate significantly from period to period and are generally driven by economic developments, primarily capital market conditions, the magnitude and timing of which are not influenced by management. Kemper believes it enhances understanding and comparability of performance by highlighting underlying business activity and profitability drivers.

A reconciliation of the numerator used in the computation of Book Value Per Share Excluding Net Unrealized Gains on Fixed Maturities and Book Value Per Share at December 31, 2018 and December 31, 2017 is presented below.

(Dollars in Millions) (Unaudited)	Dec 31, 2018	Dec 31, 2017

Underlying Combined Ratio

Underlying Combined Ratio is a non-GAAP financial measure that is computed by adding the current year non-catastrophe losses and LAE ratio with the insurance expense ratio. The most directly comparable GAAP financial measure is the combined ratio, which is computed by adding total incurred losses and LAE, including the impact of catastrophe losses and loss and LAE reserve development from prior years, with the insurance expense ratio. Kemper believes the underlying combined ratio is useful to investors and is used by management to reveal the trends in Kemper's property and casualty insurance businesses that may be obscured by catastrophe losses and prior-year reserve development. These catastrophe losses may cause loss trends to vary significantly between periods as a result of their incidence of occurrence and magnitude, and can have a significant impact on incurred losses and LAE and the combined ratio. Prior-year reserve development is caused by unexpected loss development on historical reserves. Because reserve development relates to the re-estimation of losses from earlier periods, it has no bearing on the performance of the company's insurance products in the current period. Kemper believes it is useful for investors to evaluate these components separately and in the aggregate when reviewing its underwriting performance. The underlying combined ratio should not be considered a substitute for the combined ratio and does not reflect the overall underwriting profitability of our business.

As Adjusted for Acquisition

As Adjusted for Acquisition amounts are non-GAAP financial measures. For three months ended December 31, 2018, as adjusted amounts are computed by subtracting the impact of purchase accounting adjustments from the comparable consolidated GAAP financial measure reported by Kemper. For the three months ended December 31, 2017, as adjusted amounts are computed by adding the historical results of Infinity reported on a GAAP basis to the comparable consolidated GAAP financial measure reported by Kemper. Per share amounts on an acquisition-adjusted basis for the three months ended December 31, 2017 are computed by adjusting the denominator used in the calculation of diluted net income per share by adding the number of shares issued by Kemper on July 2, 2018 in connection with the acquisition to the diluted weighted-average shares outstanding reported by Kemper on a GAAP basis for the three months ended December 31, 2017. The Company believes computing and presenting results on an adjusted basis are useful to investors and are used by management to provide meaningful and comparable year-over-year comparisons.
